**FABIO FELDMANN**

Environmentalist, Consultant, Lawyer, Company Manager, Former Executive Secretary of the Paulista Forum on Climate Change and Biodiversity, founding member and first president of S.O.S. Mata Atlântica Foundation and winner of Global 500 prize. He was also appointed Secretary for the Environment of the State of São Paulo (1995-1998), Executive Secretary of Brazilian Forum on Climate Change and Biodiversity and personal representation of the Brazilian President on Rio+10. Fabio Feldmann provided counsel to many International NGOs such as Conservation International, The Nature Conservancy, Global Reporting Initiative (GRI), Ecological Footprint and the IAG board of the International Union for the Conservation of Nature (IUCN). He was Federal Legislator for three consecutive terms (1986 – 1998) and was the author of some parts of the Brazilian environmental legislation, as the chapter about the environment in Federal Constitution Text. Yet, he drafted the Brazilian Political Strategy for Climate Change and was one of the relaters of Convention of Biological Diversity. As the Executive Secretary of the Paulista Forum on Climate Change and Biodiversity, he was responsible for the São Paulo State Policy on Climate Change, which was sanctioned by São Paulo's Governor in November, 2009 and assumes the global reduction target of 20% of the emissions of CO<sub>2</sub> by 2020, related to 2005. He has also participated, along with Fundação Getúlio Vargas (FGV) - pioneer school in teaching business administration in Brazil and a major Brazilian center of teaching, research, publication and consulting in the administration field, in the process of drafting the City of São Paulo Policy on Climate Change.

Currently, Fabio Feldmann directs Fabio Feldmann Consultores, a consulting firm that is specialized in sustainable development and environmental issues.

Fabio Feldmann is also a member of the Deutsche Bank Climate Change Advisory Board, which has the objective to advise the Deutsche Bank management on strategic questions, business risks and other aspects of climate protection. The board is composed by ten experts from business, politics and the scientific community. He is also a member of the Advisory Council of "Fundo Ecomudança" (Ecochange Fund) of Itaú Bank, an investment fund which contributes to the environment as it provides financial resources for projects to reduce carbon

emissions: 30% of the fund's management fee goes to initiatives that reduce the emission of greenhouse gases. Last but not least, Fabio Feldmann is a board member of the Brazilian Council for Sustainable Building, organization which aims to induce the construction industry to use more sustainable practices to improve the quality of life of its users, workers and the environment surrounding the buildings. The organization is a result of the relationship between business leaders, researchers, consultants, active and opinion makers.
